Stratus

Dough sheeters range

STRATUS RANGE

The equipments of the STRATUS range are table-top and floor standing dough sheeters. The baker and pastry-maker's ally for the laminating and stratification of the dough, these machines' easy and versatile use allow for consistent and delicious results in viennoiserie making.

■ EASY TO USE AND INTEGRATE

The STRATUS range from Bertand-Puma is made of table standing dough sheeters (**Junior**) and floor standing ones (**Senior** and **Senior XL**).

The **Junior** is the ideal space-saving table standing dough sheeter, able to fit in narrow areas. With a distance of 700mm between its feet, it can be put on a worktable for even more practicality. To gain valuable working space, the tables can be removed and folded up when not in use.

■ ERGONOMY AND STURDINESS

Particularly sturdy, the STRATUS dough sheeter's frame and cover are made of epoxy painted steel, and allow you to work without physical strain or fatigue.

The tear-proof feed rollers at the entry of the conveyor belt ensures a smooth and easy use. A reinforced aluminum adjustment lever guarantees a consistent final thickness of the dough bands to obtain products of regular size and weight. The ergonomic handle of the lever ensures a reliable and precise manipulation, for an effortless adjustment of the cylinder opening. Those cylinders, made of stainless steel, are protected thanks to a safety microswitch and gas springs.

A reinforced joystick that guides the procession of the dough is at the front of the machine. The **Senior XL** dough sheeter, for its part, has orange handles as well as a a pedal for the cycle reversal.

The replacement of the belts used to be a very arduous and time-consuming task. Thanks to an unlocking system of the table, it has now become much more easier and can be done in just thirty minutes per belt.

A reinforced conception and a selection of even more sturdy materials for a polyvalent and intensive use.

More technical options for an even more precise and unequalled result in the bakehouse.

■ DESIGN AT THE SERVICE OF HYGIENE

Special attention has been paid to the construction of the STRATUS dough sheeters in order to facilitate the cleaning operations. Their compact and linear design with smooth surfaces, the removable and foldable tables, or the belts in woven plastic, are all factors that simplify the daily maintenance of the machine.

■ SENIOR XL PLATINUM VERSION

The **Stratus Senior XL** dough sheeter is also available in Platinum version, full option. The table, that has been reinforced for the cutting of the dough, includes as standard a support frame for the cutting tools, with a cutting tool provided (can be changed when placing the order). For even more precision and comfort, this dough sheeter has a digital reading of the cylinder opening, a two-speed selector switch, as well as a dual control pedal for the cycle reversal.
